Icons

- Photon makes extensive use of the Silk icon set by Mark James – (http://www.famfamfam.com/lab/icons/silk/). See readme.txt in the “icons/silk” directory of the Photon distribution for more information.
- The icon for the Photon application is a modification of “applications-internet.svg” created by Jakub Steiner and Tuomas Kuosmanen, used under the terms of the Creative Commons “Attribution-Share Alike” license (http://creativecommons.org/licenses/by-sa/2.0/). The source for the modified SVG can be found in the Marketcetera source repository.
